THERMAL INSPECTION SERVICES

ADCO Roofing & Waterproofing offers the following Infrared Thermal Inspection Services to its customers in the Greater Los Angeles, Orange County, Ventura County, Riverside, and San Bernardino neighborhoods:

- ✓ Roof Surface Moisture Scan
- ✓ Interior Leak Inspection
- ✓ Solar Panel Inspections
- ✓ Non-Destructive Testing
- ✓ Water Testing

Maintaining a flat or low-sloped insulated roof is an expensive and complicated challenge building managers and owners face everyday. ADCO will provide invaluable insights to building managers by performing infrared surveys to identify moisture trapped inside the roofing system. So, rather than performing expensive roof repairs, armed with the infrared scan or moisture survey results building managers can institute targeted and less costly corrective actions.

OUR GOAL IS TO KEEP YOUR INVESTMENT MOISTURE FREE!

WOULDN'T YOU WANT TO KNOW THE CONDITION OF YOUR ROOF?

THE BENEFITS:

When compared to dealing with a catastrophic loss of a failed low slope, insulated or flat roof, annual roof thermal imaging scan and preventive maintenance is a clear winner.

We create detailed, professional reports documenting the trapped roof moisture. We design and provide infrared reports to verify the wet areas and write specifications to repair the roof.

The results of an infrared thermographic roof survey can save you thousands of dollars in unexpected roof repairs on a new building purchase or to confirm the integrity of a roof prior to a sale.
